**BA 400**

BioSystems

# Efficiency and Autonomy

Clinical Chemistry Analyser

Clinical analysis

human - centred biotech

Our main goal is to optimise  
the laboratory workflow and  
improve the user experience.

BA400 system:  
updated to suit our  
users needs.

# Technological innovation

## Minimum working time

The new segmented samples rotor improves the analyser workflow and allows continuous sample loading. New enhanced maneuvers reduce sample loading time and optimise our users efforts.

## Reliable validated system

Dedicated and validated reagents ensure a robust and reliable analytical system. The reagent barcoding and volume detection system allow to manage the amount of reagent in the system at any time and simplifies users daily work.

## Make your work easier

Automation saves time and avoids manual procedures. The new automatic haemolysis function guarantees more accurate results.

## Highest performance, minimal maintenance

BA400 improves your laboratory resources and minimise the required system maintenance. The optics, based on our LED technology, will lead users to have full confidence in the reported results.

‘Working with the BA400 system is a real pleasure. Since I work with the new segmented sample rotor, I finish my work on the device much faster and can focus my daily work on other issues’.

specifications at:

# Systemic solutions

In combination with the original dedicated BA reagents (complete panel of clinical chemistry including special test), the BA400 forms a complete system that perfectly adapts to the demands of the laboratories in its segment.

The BA System and our worldwide customer care team offer together a complete solution, integrating reagents and analyzers jointly designed and validated under the same european brand.

Our main focus is to satisfy our users requirements and strive to exceed their technical, economical and human expectations. We are committed to provide the best possible user experience.
